This translates in a **quicker process of taking decisions and adopting results.** Building qualitative services and trust is the work of a team with more than 16 years of experience in the competitive field of aviation.

Darío Rubio

CEO

Currently all the Airlines recognises their need to reduce the costs. One of the most important key factor for reach it, is to have a smart and efficient material logistic. Accomplish with high accuracy all the transits and delivery times scheduled. It's the reason why we design a modern and flexible corporative structure that is what allows us all our customers get a customize service with very quick answers to all their requirements and needs, without that it will create a costs increase. Is the ED Aviation's target to become as a reference company, on the supply chain and material management performed on smart and economic way.

Ennio M. Iacovone

GENERAL MANAGER

During year 2013 together with Dario we decided the ED Aviation, Currently the Aerocommercial Industry have a growing demanding for professional with long experience in Maintenance engineering and Project management. For this reason, we joining our 16 years' experience, on the industry managing very important projects for market leader passenger Companies and Cargo as well. We know very well how much is important care the trust of our company have on ED Aviation and our efficiency and professionalism. That's is why, we focus on deeply customize service to each of them.
